The table shows your past withdrawals. If you want to withdraw, click "Withdraw Funds" button.

Then, select the bank account you want the payment to go to. Enter the amount you want to withdraw.

You will be required to re-enter your password to withdraw, to keep you safe.

To be safer, you can activate 2FA authentication on your profile, which means anytime withdrawal is being initiated on your account, we send a code to your email, then you will need to enter the code before the withdrawal is approved. This way, a stranger will not just log in and steal your funds even if they know your password.

WHAT'S NEXT?

Once you submit, you will get your money instantly as our withdrawal process is immediate.

REJECTED WITHDRAWAL?

In rare cases, withdrawal might be rejected because of two reasons.

1. Your bank is unavailable at that moment
2. Your bank account cannot receive up to the amount you are trying to withdraw.

WHAT IF YOU DO NOT GET YOUR WITHDRAWAL INSTANTLY?

In most cases, Prestmit withdrawals are instant. But if you do not get your payment within a few minutes, it's okay.
