

# PRESTMIT

How To Secure Your Prestmit  
Account Using 2FA  
Authentication.

# SECURITY IS KEY!

To make it easy for our customers, in this guide, we have explained in detail, the process of securing your Prestmit account.

# WHAT IS 2FA AUTHENTICATION?

Two-factor authentication is an extra layer of security that requires the user to provide two different types of information before establishing access to a feature.

Let's say, for instance, you want to login.

If 2FA is not active, only a password is required.

If 2FA is active, the password is required, then a code will be sent to your email address and you'll need to input the code before you'll be able to log in. That way, no one can log in to your account even if they have your password.

## **WHY ACTIVATE 2FA?**

The vulnerability of passwords is the main reason for requiring and using 2FA. Someone can guess your password, maybe a close friend, or see you type it. In fact, there are browsers that save password history, which means anyone that has access to your browser can log in.

To keep our customers secure, we advise that they activate 2FA everytime.

# HOW TO ACTIVATE KYC

Proceed to your Profile Page.

Under "Two Factor Authentication", you can toggle ON/OFF 2FA for login and withdrawal.

Once toggled on, anytime you want to login or withdraw, a random code will be sent to your email and you will be required to enter the code to perform the action successfully.

You can turn it off using the same procedure. However, a code will be sent to your email to also turn it off.

## **AFTER ACTIVATING 2FA?**

Now, you are secure! And ready to flex the safety of your Prestmit wallets.

# WHY PRESTMIT?

Having served thousands of customers over the years, it's safe to say Prestmit is best for your transactions.

**40,000 USERS**

Over 40K active users  
and stil counting...
